## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20 and 37-58, drawn to a storage compartment classified in class 296, subclass 37.1.
  - II. Claims 21-28 and 29-36, drawn to a method and a system, classified in class 280, subclass 504.
2. The inventions are distinct, each from the other because of the following reasons:

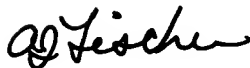

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions do not have to be used together, (e.g. the system does not require a trailer hitch mounting portion. Furthermore, they have different modes of operation because the storage compartment may be used to store any number of things while the system is designed to act in a particular function (e.g. "limiting the reciprocation between the mounting member . . .").
3. Because these inventions are distinct for the reasons given above, because the search required for Group I is not required for Group II, and because the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Jeffery S. Schubert on December 20, 2000 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew J. Fischer whose telephone number is (703) 305-0292.
